

On The Mission

NITROMI
GALIEN

Artist Bio

Nitromi Galien is a multidisciplinary artist dedicated to music, visual art, design and poetry. She is the founder of the traveling Techno project On The Mission, born and currently living in Slovakia.

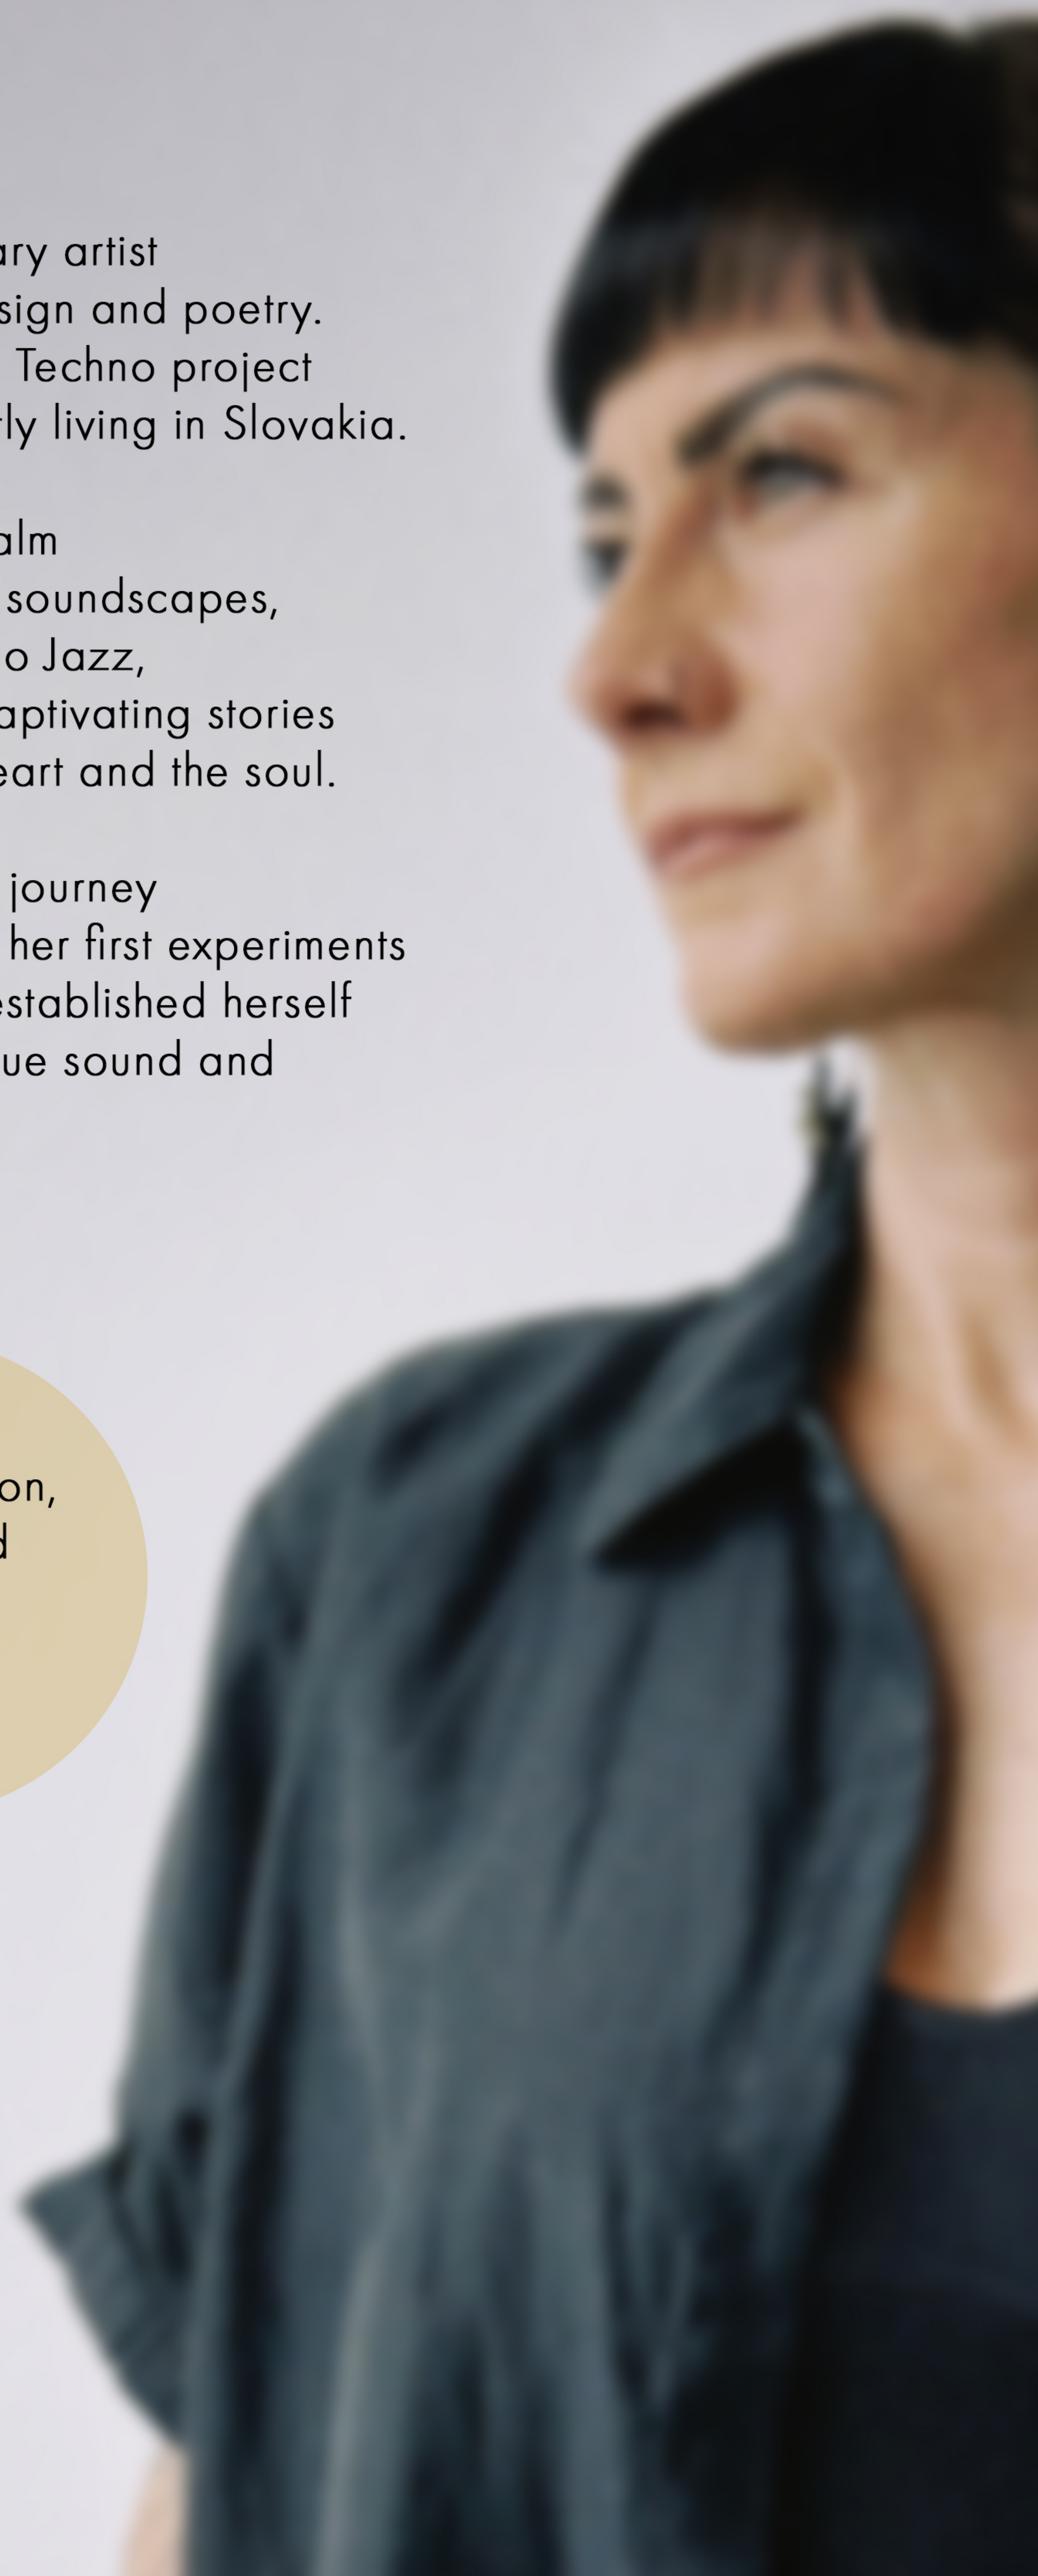

Her musical passion lies in the realm of hypnotic Techno, minimal sci-fi soundscapes, deep ethereal ambient and Techno Jazz, sounds that allow her to weave captivating stories designed to stimulate the mind, heart and the soul.

Nitromi embarked on her musical journey in 2020 as a producer, releasing her first experiments independently. A year later, she established herself as a digital storyteller with a unique sound and narrative-driven sets.

On The Mission

In 2022, Nitromi launched her new Techno project On The Mission, which aims to bring her vision and current quality sound to listeners, as well as support the community and connect like-minded artists.

The project is welcoming future-oriented music, and at the moment it includes a former hypnotic podcast and a traveling Techno event with an international lineup.
